Technology Assisted Language learning (TALL)

Technology Assisted Language learning (TALL)

Technology Assisted Language learning is an interactive method of instruction that helps learners achieve their goals of learning at their own pace and ability. In this method computer technology is used in teaching learning procedure.

Now a days as the world is moving forward with Technology and due to the reduction in the cost of the computers most educational institutions can afford to have computer systems. A computer lab is now a days seen as an essential requirement in any educational institution because of the increased awareness among the students, teachers and managements.

It helps in enriching English language skills.

It is ideal for carrying out repeated drills. Student can practise many number of times the same activity.

It provides impartial feedback there is no human interference in the correction process.

It creates realistic environment, because listening and speaking activities are combined with visuals.
It is ideal for integrating skills such as reading, writing, speaking and listening activities.
